

ECCO 60/65AS PRO LEATHER

Special version of Ecco 65AS HVLP adapted for the leather industry. The gun is well suited for reciprocators or carousels. The paint needle has air operated opening and closing by spring action. The short reaction time ensures a perfect spraying result and low paint consumption. The needle seal is adjustable during operation Simple and rigid mounting and service, requiring only standard tools. Precise alignment by a locating pin. Large paint supply control unit with exact setting with stepped positions. Stainless steel versions for abrasive or water borne paint.

The below list only shows a small part of the total spray gun range, please contact us for all types.
