

ECCO HELIX

This stirrer has a unique Helix-shaped stirrer blade to screw down through the 2" hole of a 200 litre drum. The stirrer is then fastened by its threading. The Ecco Helix has shaft and propeller in stainless steel for abrasive fluids. It is highly effective and can also be used other containers with the same depth. Both silencer, speed control valve and quick coupling is included.

The stirrer can also be mounted on a 200 litre container using the extra edge bracket.

TECHNICAL DATA

Total length	850 mm
Propeller diameter	80 mm
Weight, complete unit	8,2 kg
