

## PAINT PRESSURE REGULATORS

Paint pressure regulators with pneumatic or spring controlled regulation of the paint pressure. This new generation of paint regulators will give you high accuracy on the paint pressure and will reduce the pulsations in your paint supply system to a minimum.

All parts in contact with the paint are made in stainless steel which makes them suitable for waterborne paint.

	FlowCol 06	FlowCol 10	FlowCol 15
Max Fluid inlet pressure	10 bar	10 bar	14 bar
Max regulated outlet pressure	8 bar	8 bar	8 bar
Min. regulated outlet pressure	0,5 bar	0,5 bar	0,5 bar
