

ECCO 41FA

Ecco 41FA has been developed to provide an economic solution to access difficult locations with a robot arm maintaining all Ecco proven finishing and saving quality.

Ecco 41 provides:

- Compact and small
- Light weight
- High performance nozzles and aircaps according to ECCO standard
- Easy maintenance
- Low investment cost
- Low maintenance cost due to long lifetime of Ecco components and complete gun body in stainless steel.
- All material- and air connectors are included.
- Wide variety of nozzle/aircap combinations, incl. tungsten carbide nozzles.
- Many connection possibilities for robots and reciprocators.

Coming without internal needle or diaphragm, Ecco 41FA is particularly suitable for spraying abrasive materials such as glaze, enamel etc. Ecco FlowCol external valves can be used for controlling function and material flow.
