

## ECCO FLOW M2P 18B

Ecco Flow M2P is a small and handy pump, designed for transferring all type of fluids, both solvents, paint and abrasive fluids. The pump is designed to pump all fluids that need to be transferred, and is therefore suitable in all types of industries. It has a low weight and small dimensions, making it easy to handle and easy to install. Ecco Flow M2P can be driven against closed valve to a standstill without being damaged. This feature can also be utilized as a remote control as it makes the pump start and stop without manual attention when the valve is opened or closed.

"Ecco Flow Transfer Pack" (Ord. No 8621 0110 54) is a complete package, consisting of the pump, a suction tube for 200 lit std barrel, air valve, 5m air hose and 3m fluid hose. Earthing device and throttle valve are accessories.

### TECHICAL DATA

Pressure ratio	1:2
Capacity (with water)	40 liter per minut
Max work pressure air	7,5 bar
Air consumption at 6 bar	0-200 liter per minut
Connection air	G 1/4 utv.
Fluid inlet	G 1 inv.
Fluid outlet	G 1/2 inv.
Weight	1,2 kg
Material piston rod	Hard cromed stainless steel
Material piston rod packing	Teflon
Cylinder	Nitride harded stainless steel
Material pump housing	Glas-fibre reinforced polyamide
