

ECCO FLOW M2P 20B

Ecco Flow M2P 20B is a small and handy pump, designed for transferring all type of fluids, both solvents and paint. The pump is designed to pump normal types of fluids that need to be transferred, and for abrasive fluids we recommend the M2P 18B in stainless steel. It has a low weight and small dimensions, making it easy to handle and easy to install. Ecco Flow M2P can be driven against closed valve to a standstill without being damaged. This feature can also be utilized as a remote control as it makes the pump start and stop without manual attention when the valve is opened or closed.

TRANSFER PUMP M2P 20B

Ecco Flow M2P Transfer Pack is a complete package consisting of pump M2P 18B or M2P 20B, a suction tube for a 200 litre standard barrel, air valve, 5m air hose, 3m outlet hose. Eathing device and throttle valve are accessories. Transfer Pack M2P 18B is mainly intended for pumping of abrasive materials, paints and solvents.

Type	Article No.
Ecco Flow M2P 20B	8621 0110 09
Transfer Pack complete	8621 0110 58

TECHICAL DATA

Pressure ratio	1:2
Capacity (with water)	40 liter per minut
Max work pressure air	7,5 bar
Air consumption at 6 bar	0-200 liter per minut
Connection air	Quick coupling / air hose 3/8" int.
Fluid inlet	G 1 inv.
Fluid outlet	G 1/2 inv.
Weight	1,5 kg
Material piston rod	Brass
Material piston rod packing	Teflon
Cylinder	Brass
Material pump housing	Glas-fibre reinforced polyamide
