

## ECCO 75AP

The Ecco 75AP is designed for applications in small and narrow areas. It has a 70% reduced inner space for the paint, which reduces the paint consumption, especially when many colour changes are made. Angles of paint channels have been optimized for best possible cleaning effect. Well-known technology has been used in air caps and nozzles in combination with optimal design of the gun body. The result is a very compact unit with highest possible performance.

### TECHNICAL DATA

Body	Stainless Steel (SS)
Paint nozzle	SS or Tungsten Carbide (TC)
Air cap	Aluminium / Tufram*
Needle	4mm SS or TC
Sealings	Teflon/Perfluor 128**, UHMV
Weight	490 g

\*Treated by unique process of hardening and reducing friction on aluminum.

\*\*Perfluor 128 is equal to Kalrez 4079
