

ECCO-415

The ECCO 415 is the newest generation of sealing applicators from Ecco Finishing AB. It is designed for seam sealing, under body sealing/spray (UBS) and liquid applied sound deadening (LASD). Compact design and low weight (less than 4kg) make it very versatile and easy to use in confined spaces.

FEATURES:

- ▶ Single or dual material can be applied with the same unit
- ▶ Optional material circulation
- ▶ Integrated temperature sensor
- ▶ Integrated pressure sensor
- ▶ Nozzle head with a wide range of nozzle and slot angles
- ▶ Aluminum or stainless steel versions (for water based material)
- ▶ Can be insulated for optimal temperature control
- ▶ Easy adaptation to different robots
- ▶ Maintenance friendly with no internal electronics
- ▶ Plug and play replacement for earlier Ecco applicators (400/410)

For cosmetic (hem) sealing, Ecco 470 is recommended.
